*together  
we care*

## THE INSIDE OUT HOSPICE APPROACH

### What do we currently do?

We have supported the palliative care needs of Inverclyde for the past 35 years from two bases in the west end of Greenock. Delivering a tailored specialist palliative care service for our patients that suits everyone's needs and wishes throughout their journey.

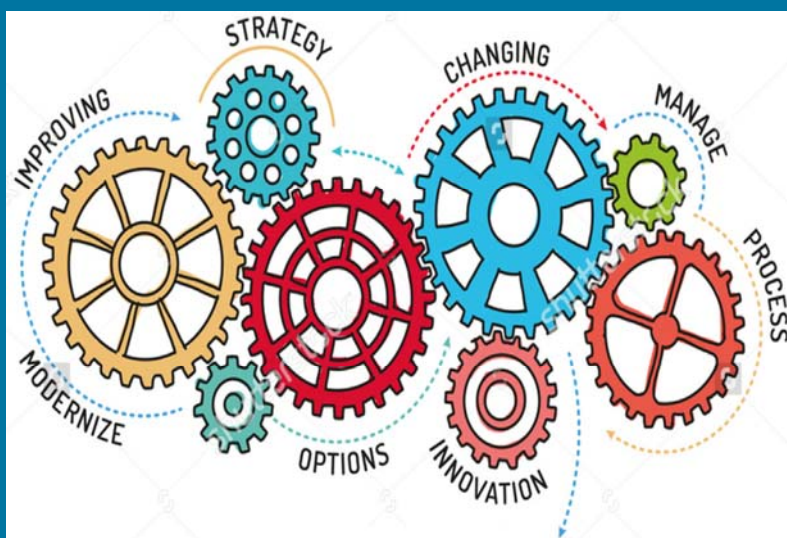

We are a teaching hospice with close links to the University of the West of Scotland, facilitating school placements and open days for medical students. We gained University Teaching Hospice status in 2014.

### What are we trying to accomplish?

With the financial support of the Big Lottery, we are in the first of a four year programme which will deliver the Inside Out Hospice approach, transforming and developing our services.

The new approach will ensure our services are more accessible by stretching and reaching deeper and wider into our local communities.

How will we  
get there?

Feedback and measure success

Transform, Implement and Monitor

Develop relevant responses

Analysis of needs and wishes

Collaborating with Partners

Consulting with Communities
